

Conference & Meeting Rooms

New ways of relating

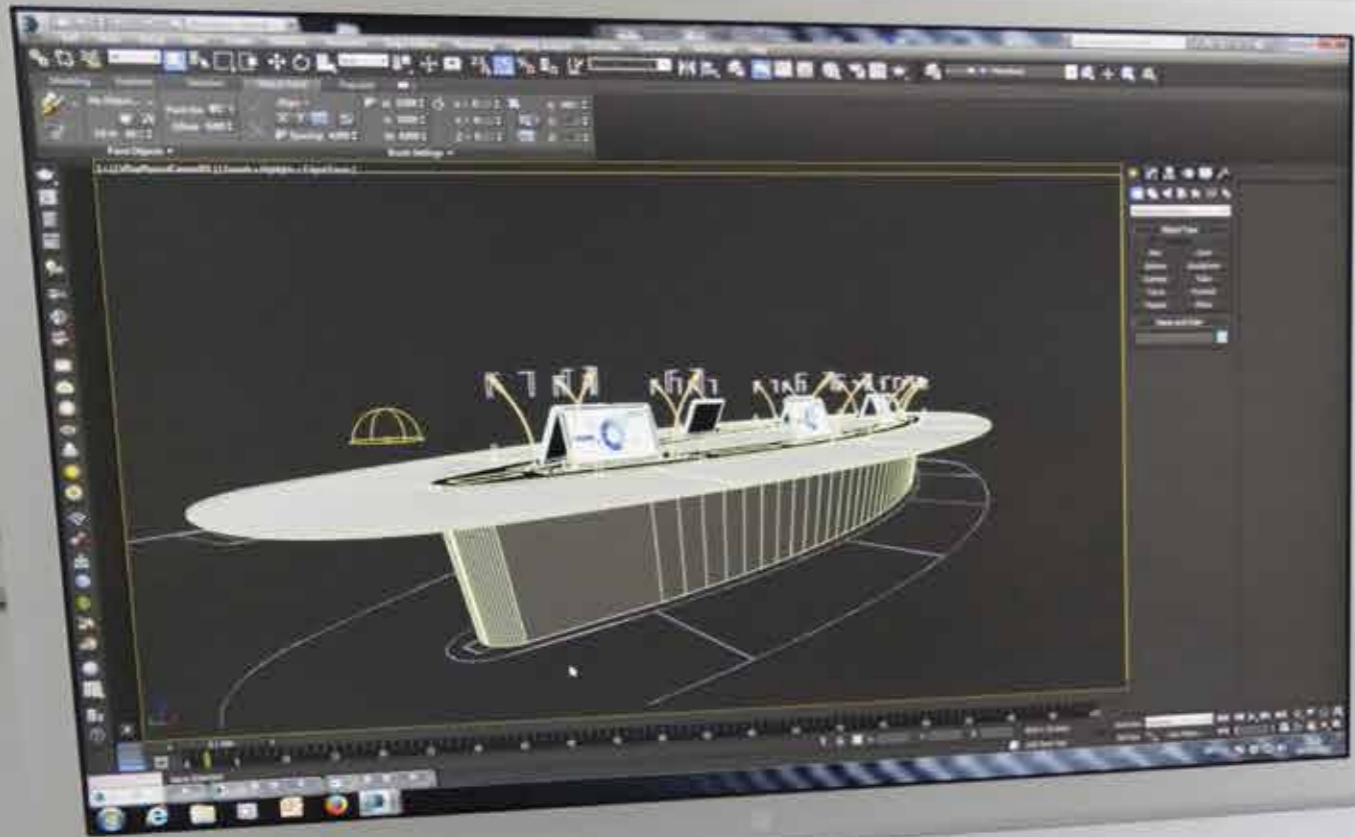

The essence of the meeting

A space defines the relationship that is established between people. We meet with a common purpose, unifying ideas within one collaborative communication system to reach the best possible decision. Ergonomics converge with technology to place people at the centre of the action. This is our goal. And we have achieved it.

Imagin in integrated spaces

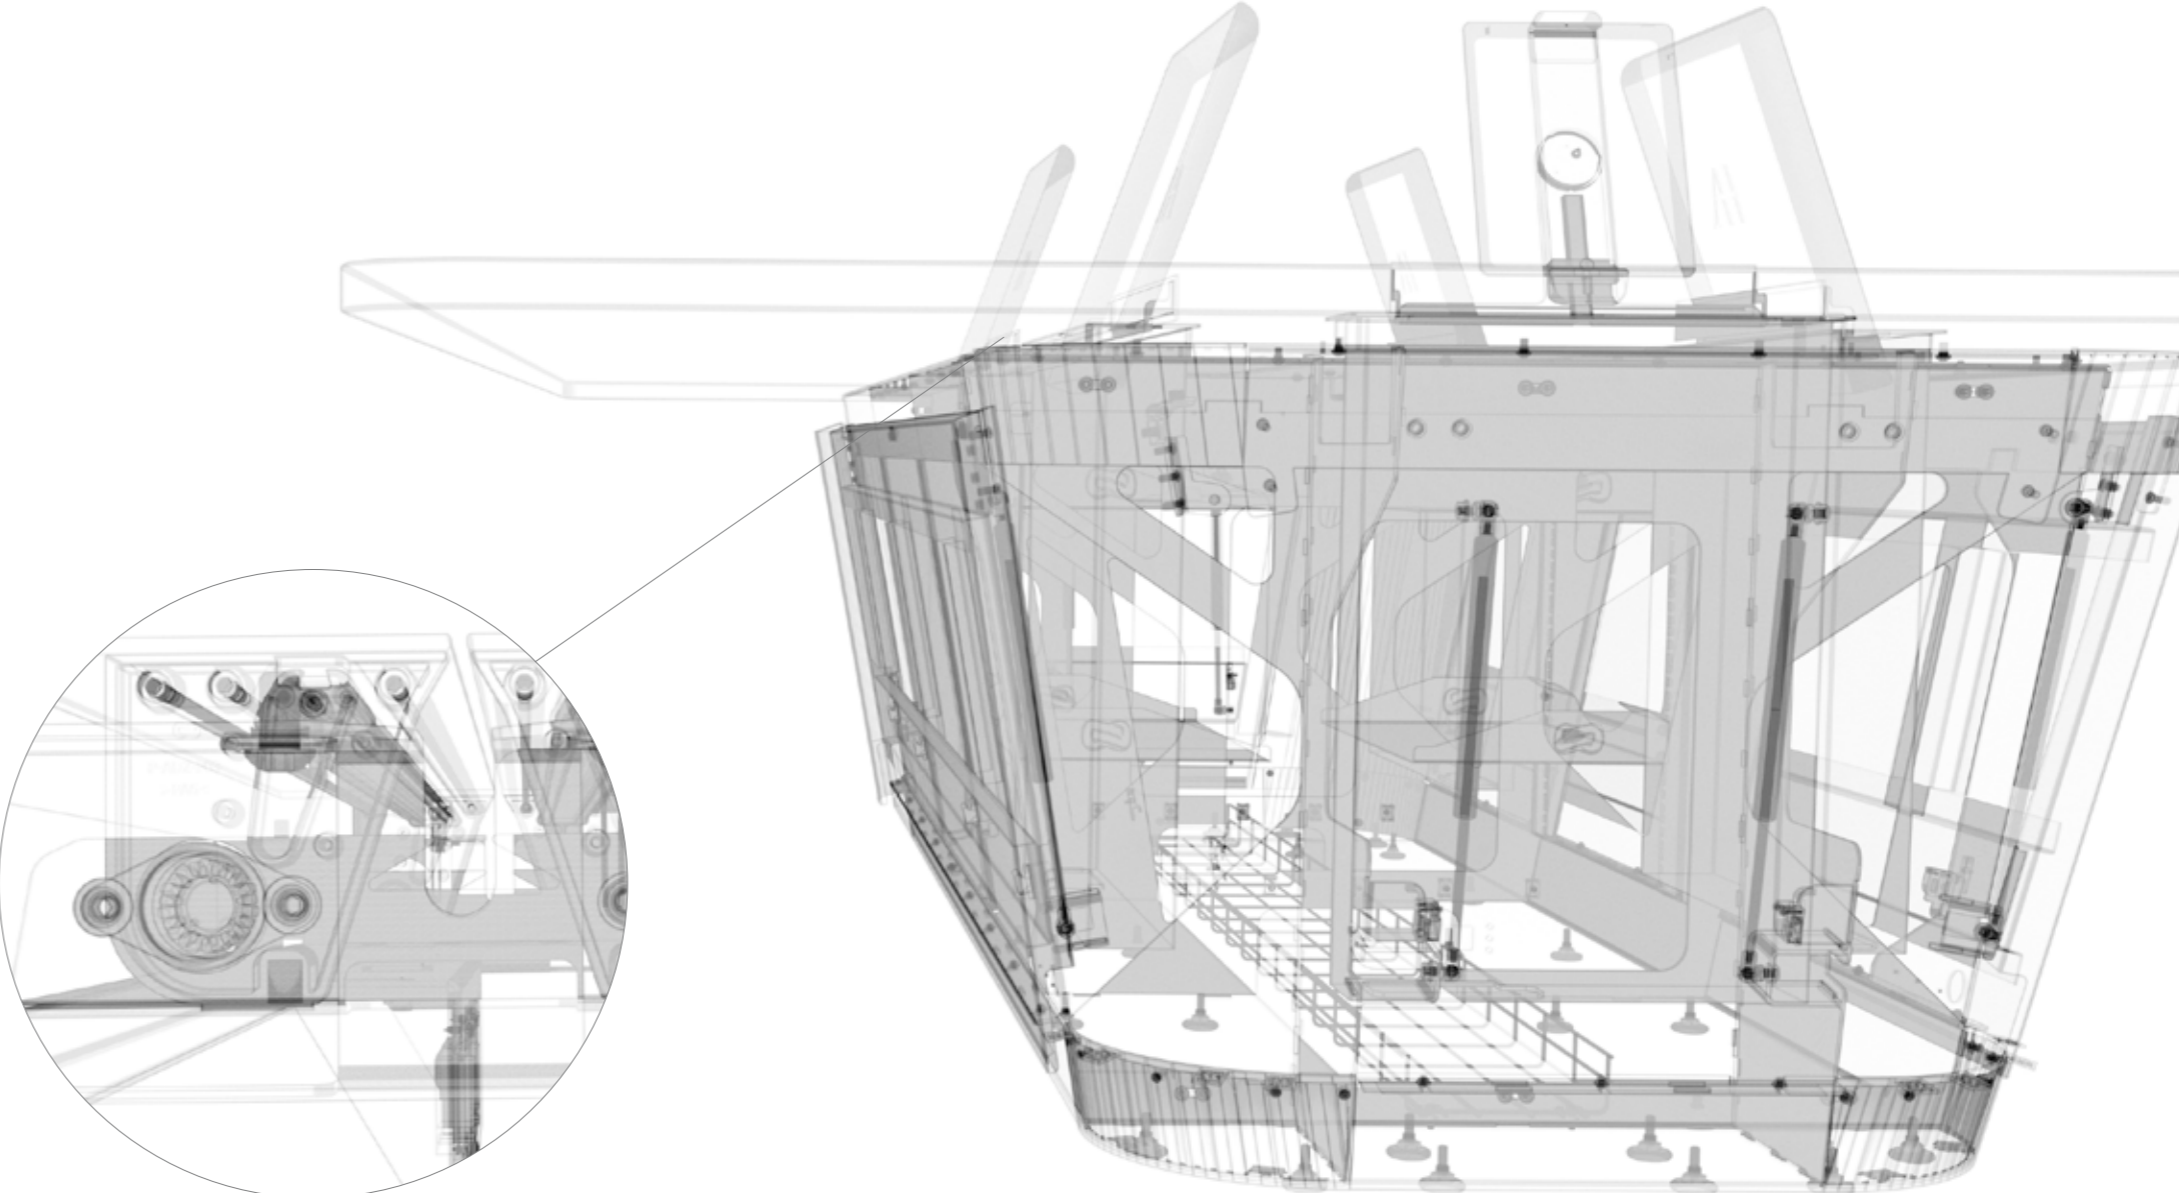

- Conceptualisation
- Interior design
- Customised environments
- Engineering and manufacture
- Display systems
- Corporate video conferencing
- Collaborative systems
- Encrypted microphone system
- Translation and interpretation
- Intuitive automation
- Management of media and spaces
- Digital signage
- Optimised lighting
- Acoustic and visual privacy

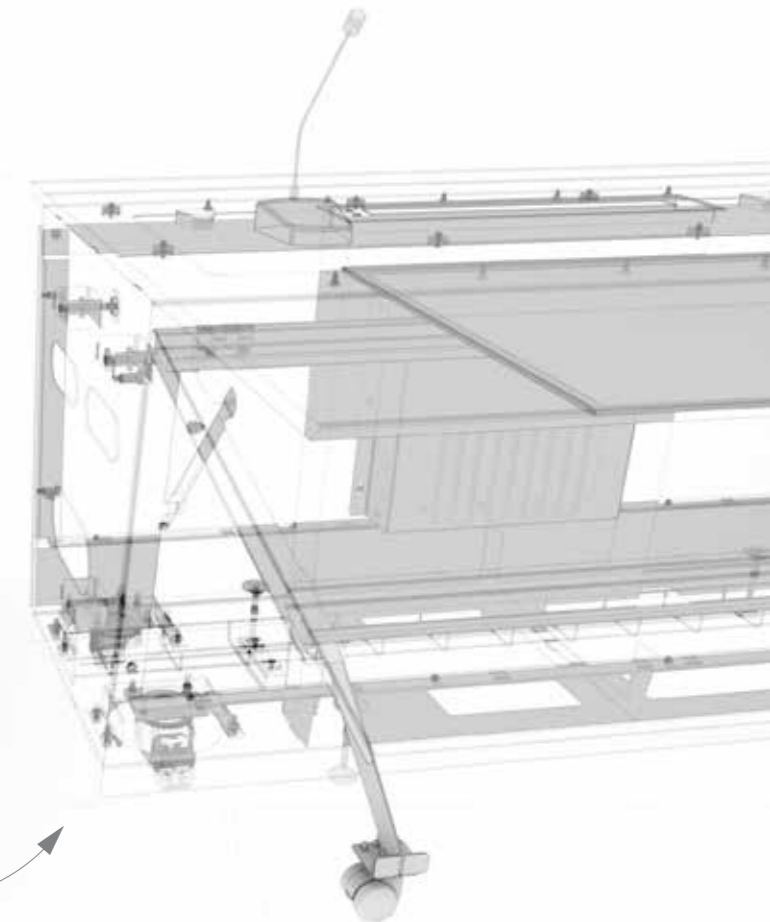

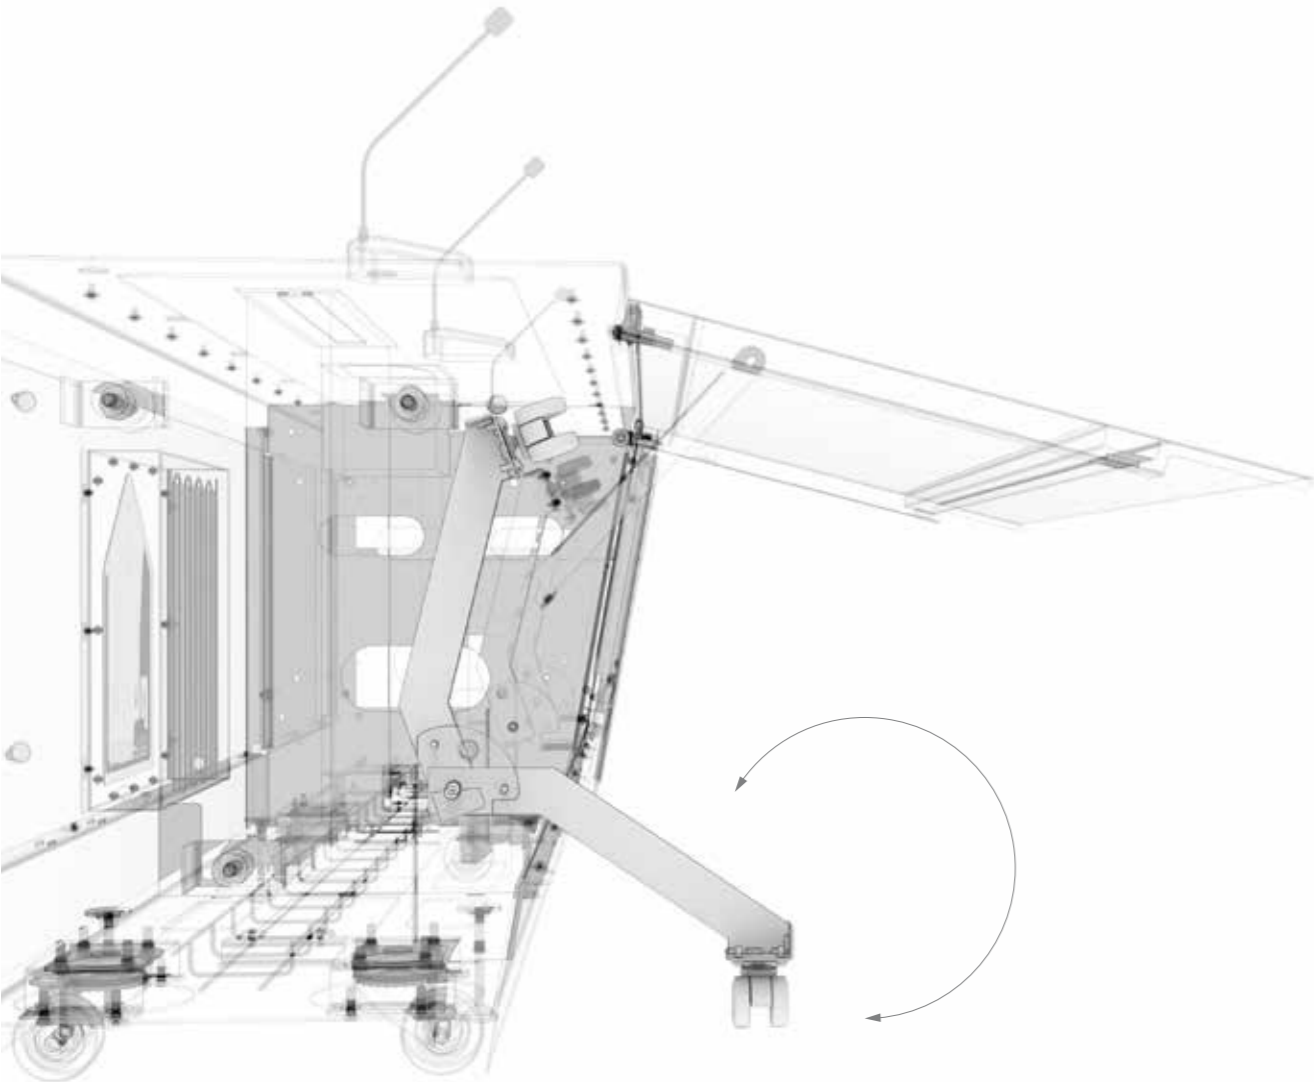

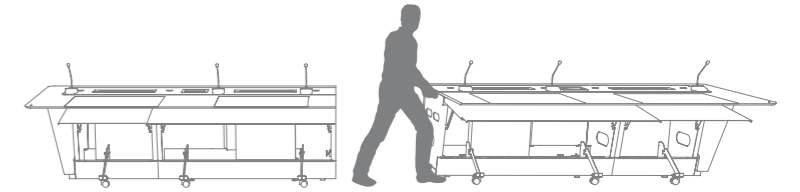

One concept. One solution

The cycle of new work spaces starts with an vision that inspires the design and that the engineering process converts into reality. We won't settle for predicting the future. We want to create it Without limitations.

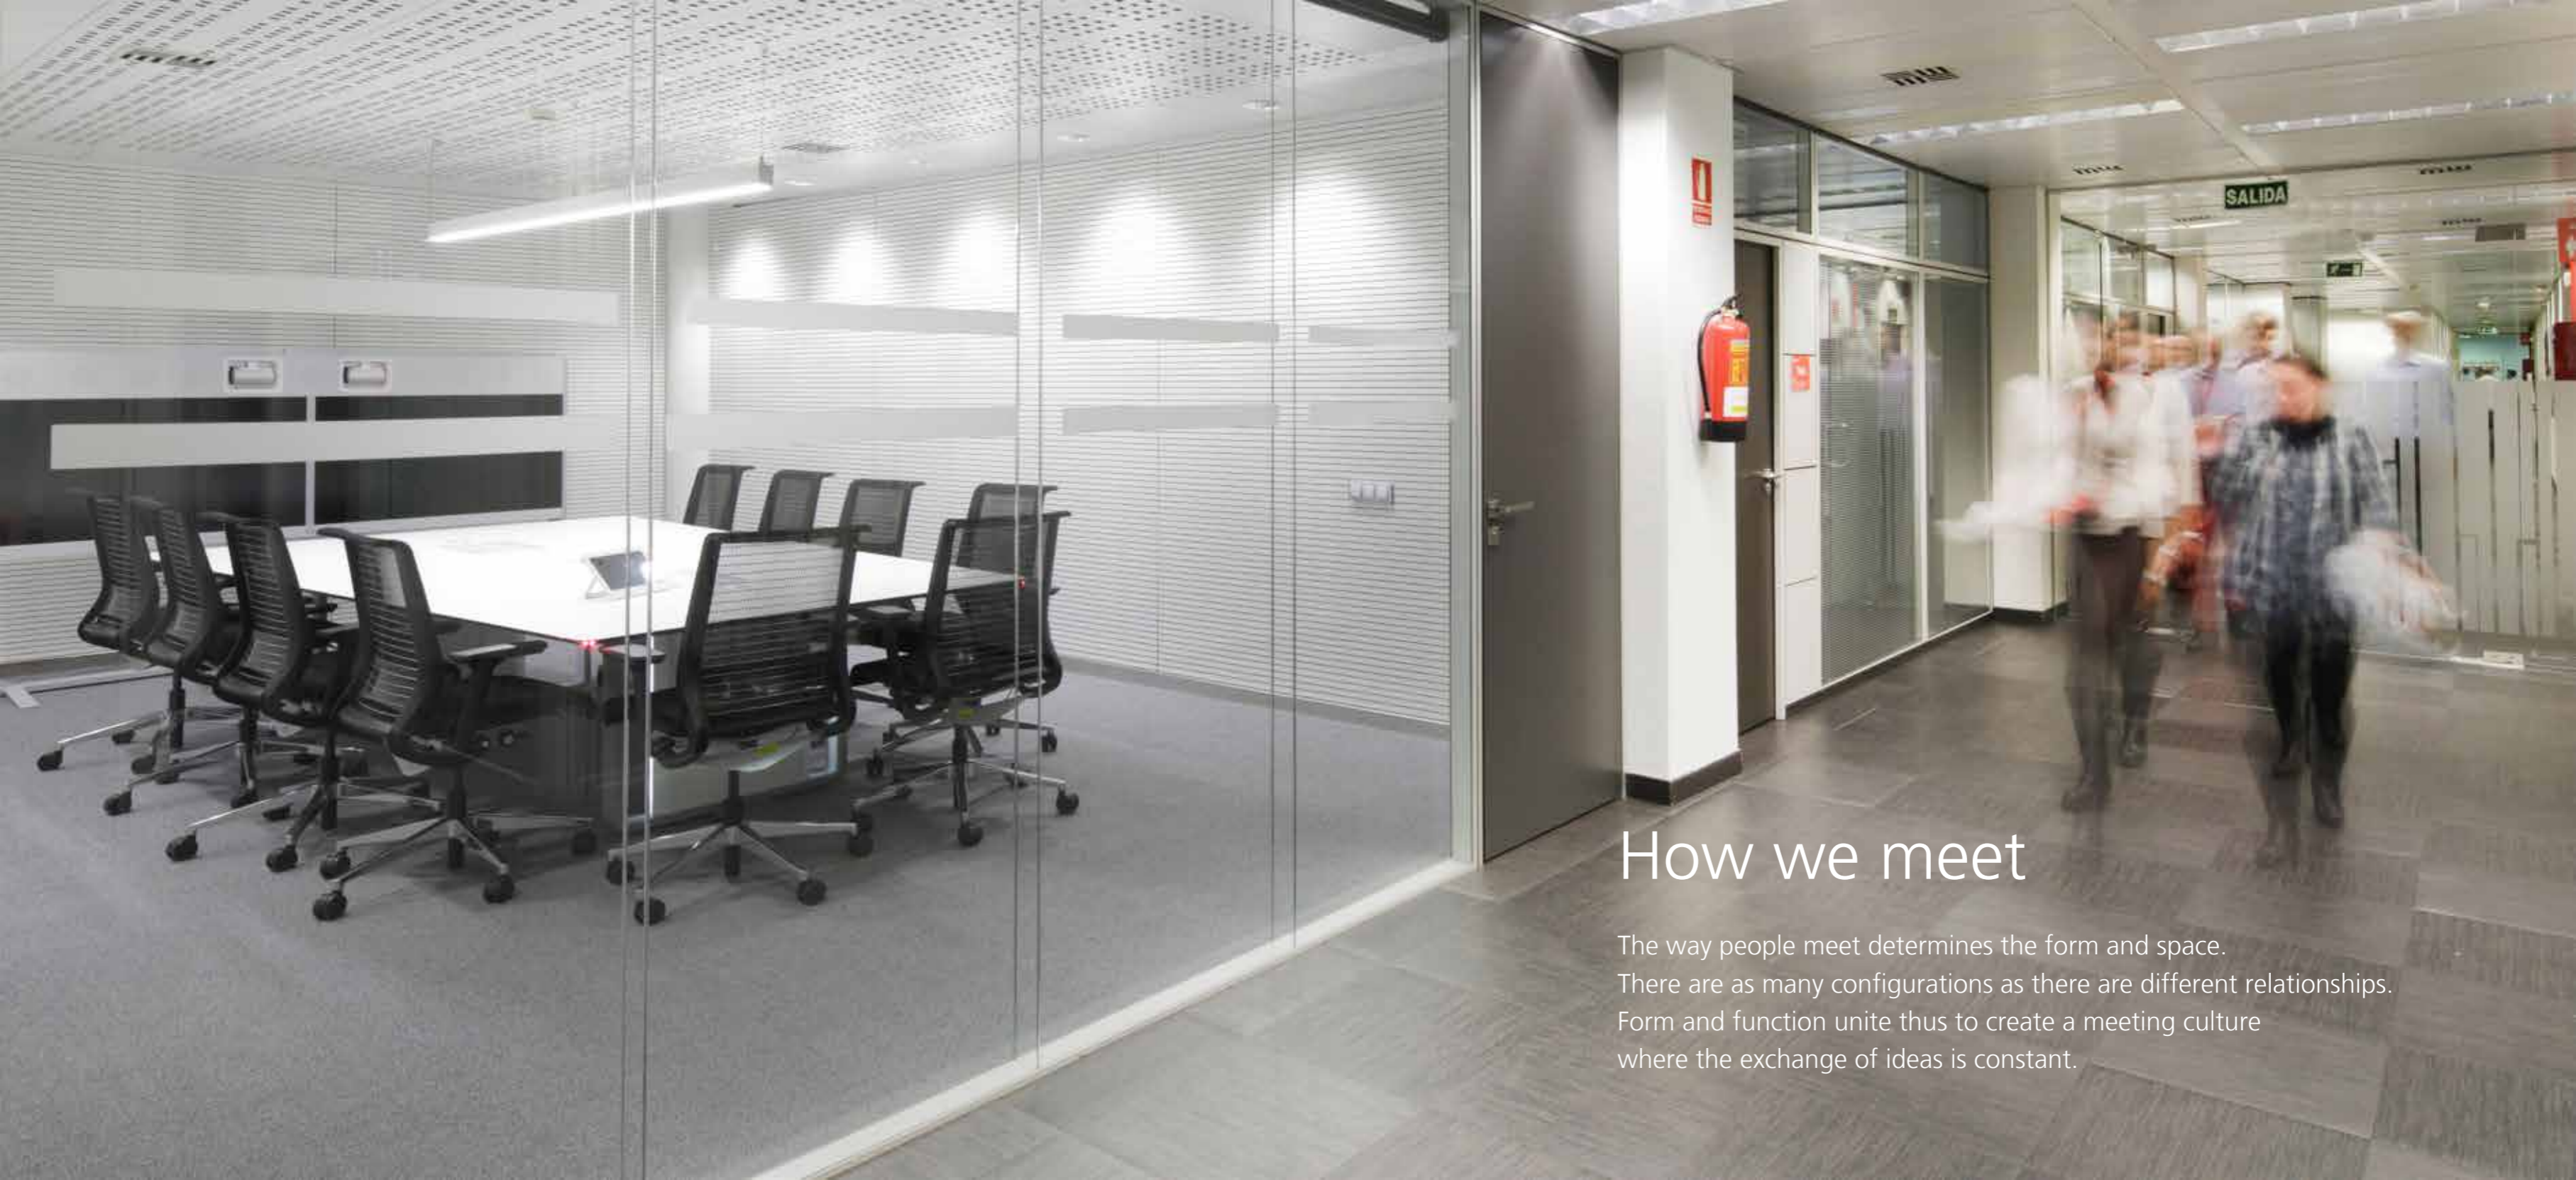

Committed to innovation

The impossible becomes reality. Complications become simplified. Innovation adapted to every need. Movement. Modularity. Unique, original and brilliant solutions for breaking the mould and creating new parameters in meeting rooms in any field.

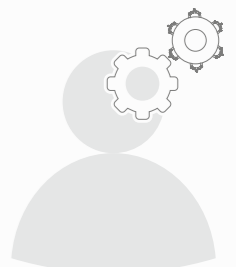

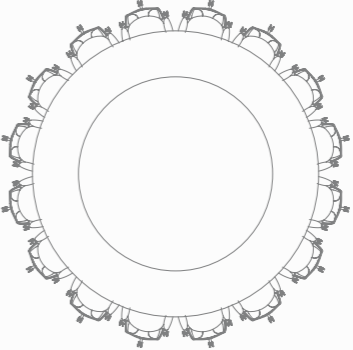

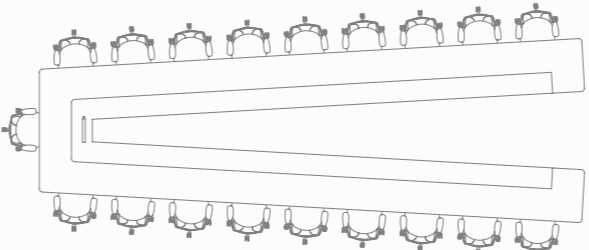

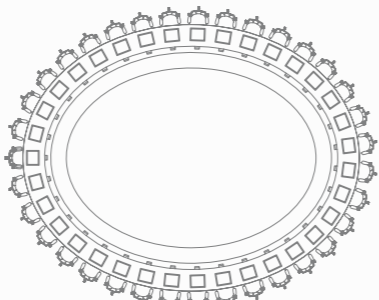

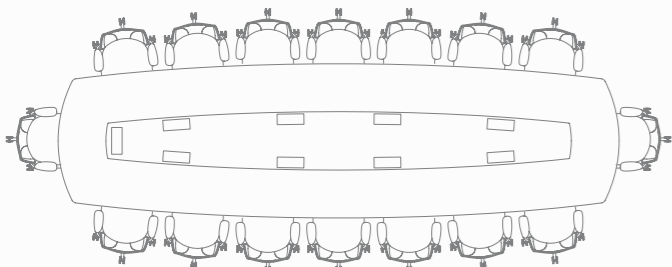

How we meet

The way people meet determines the form and space. There are as many configurations as there are different relationships. Form and function unite thus to create a meeting culture where the exchange of ideas is constant.

Action creates form

Form adapts to space

Ergonomics, health and comfort

People are at the centre of the design, thereby ensuring the maximum quality of work for all users.
Quick access to equipment and ease of maintenance create a healthy, innovative environment guaranteeing maximum ergonomics.
An impeccable space, even in the most subtle elements, for achieving success.

Incorporating technology

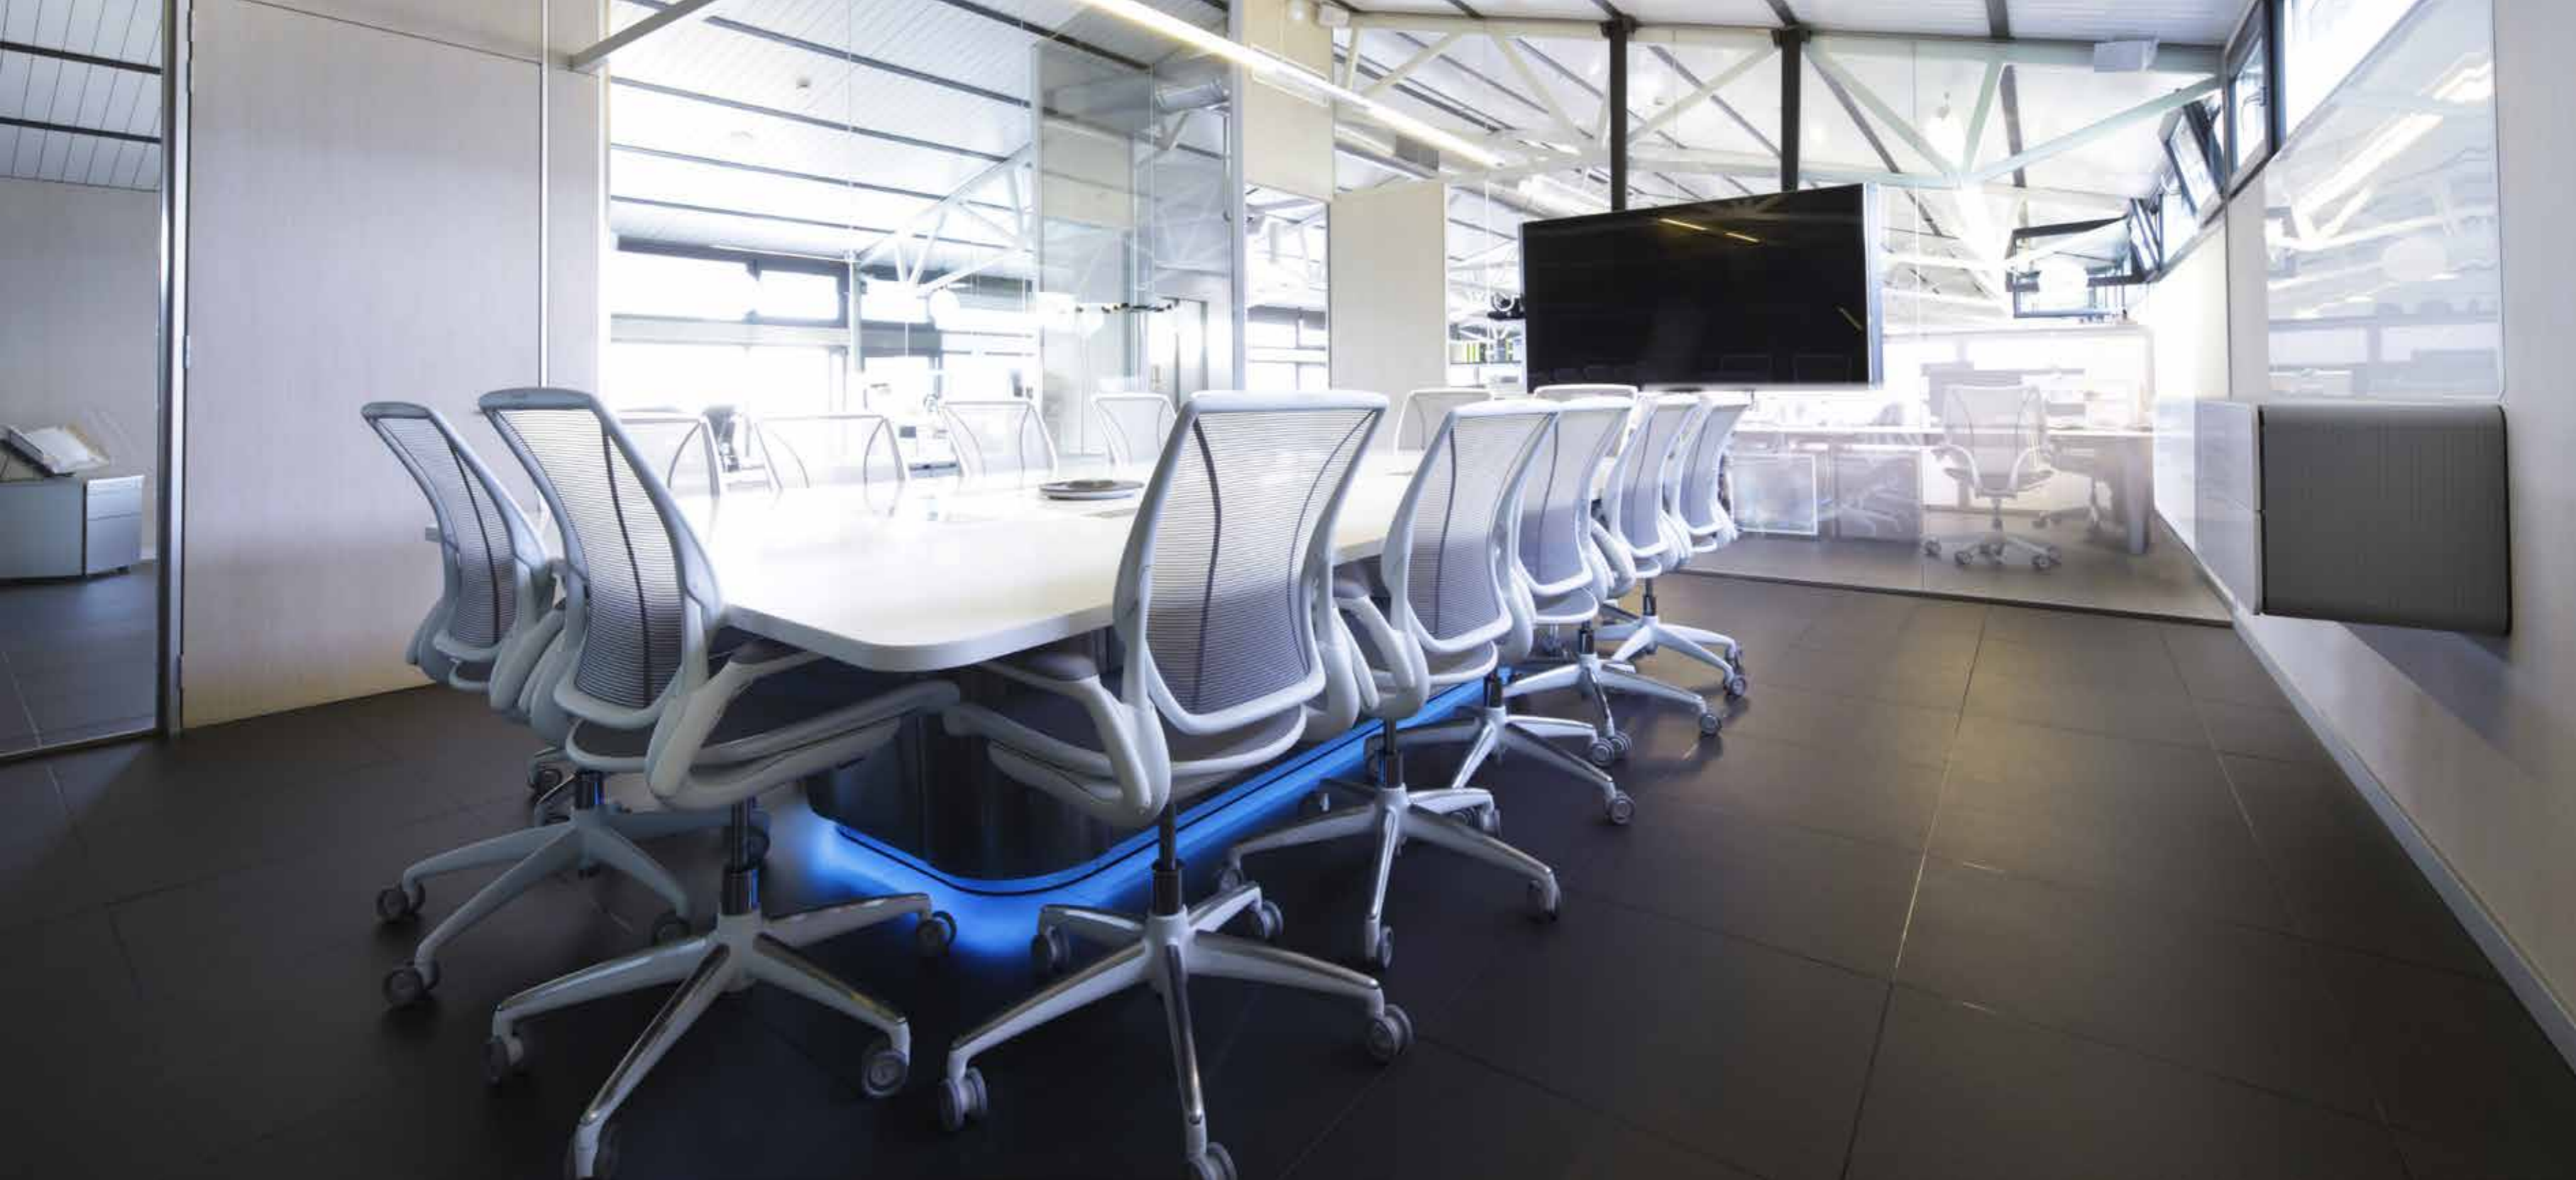

Technology is incorporated in an invisible and innate way to offer the user a unique experience. Data, energy, sound and images are easily managed to improve the transmission of information, ideas and concepts. We greatly increase technological possibilities to encourage decision making and collaborative work.

Accessories and equipment are perfectly incorporated within the unit, obtaining a uniform, exclusive design.

Timeless solutions. Inspiring spaces

Involvement in critical environments 24/7

Multipurpose for decision making at critical times and in times of emergency. Access to information systems by means of the most advanced technological and ergonomic parameters.

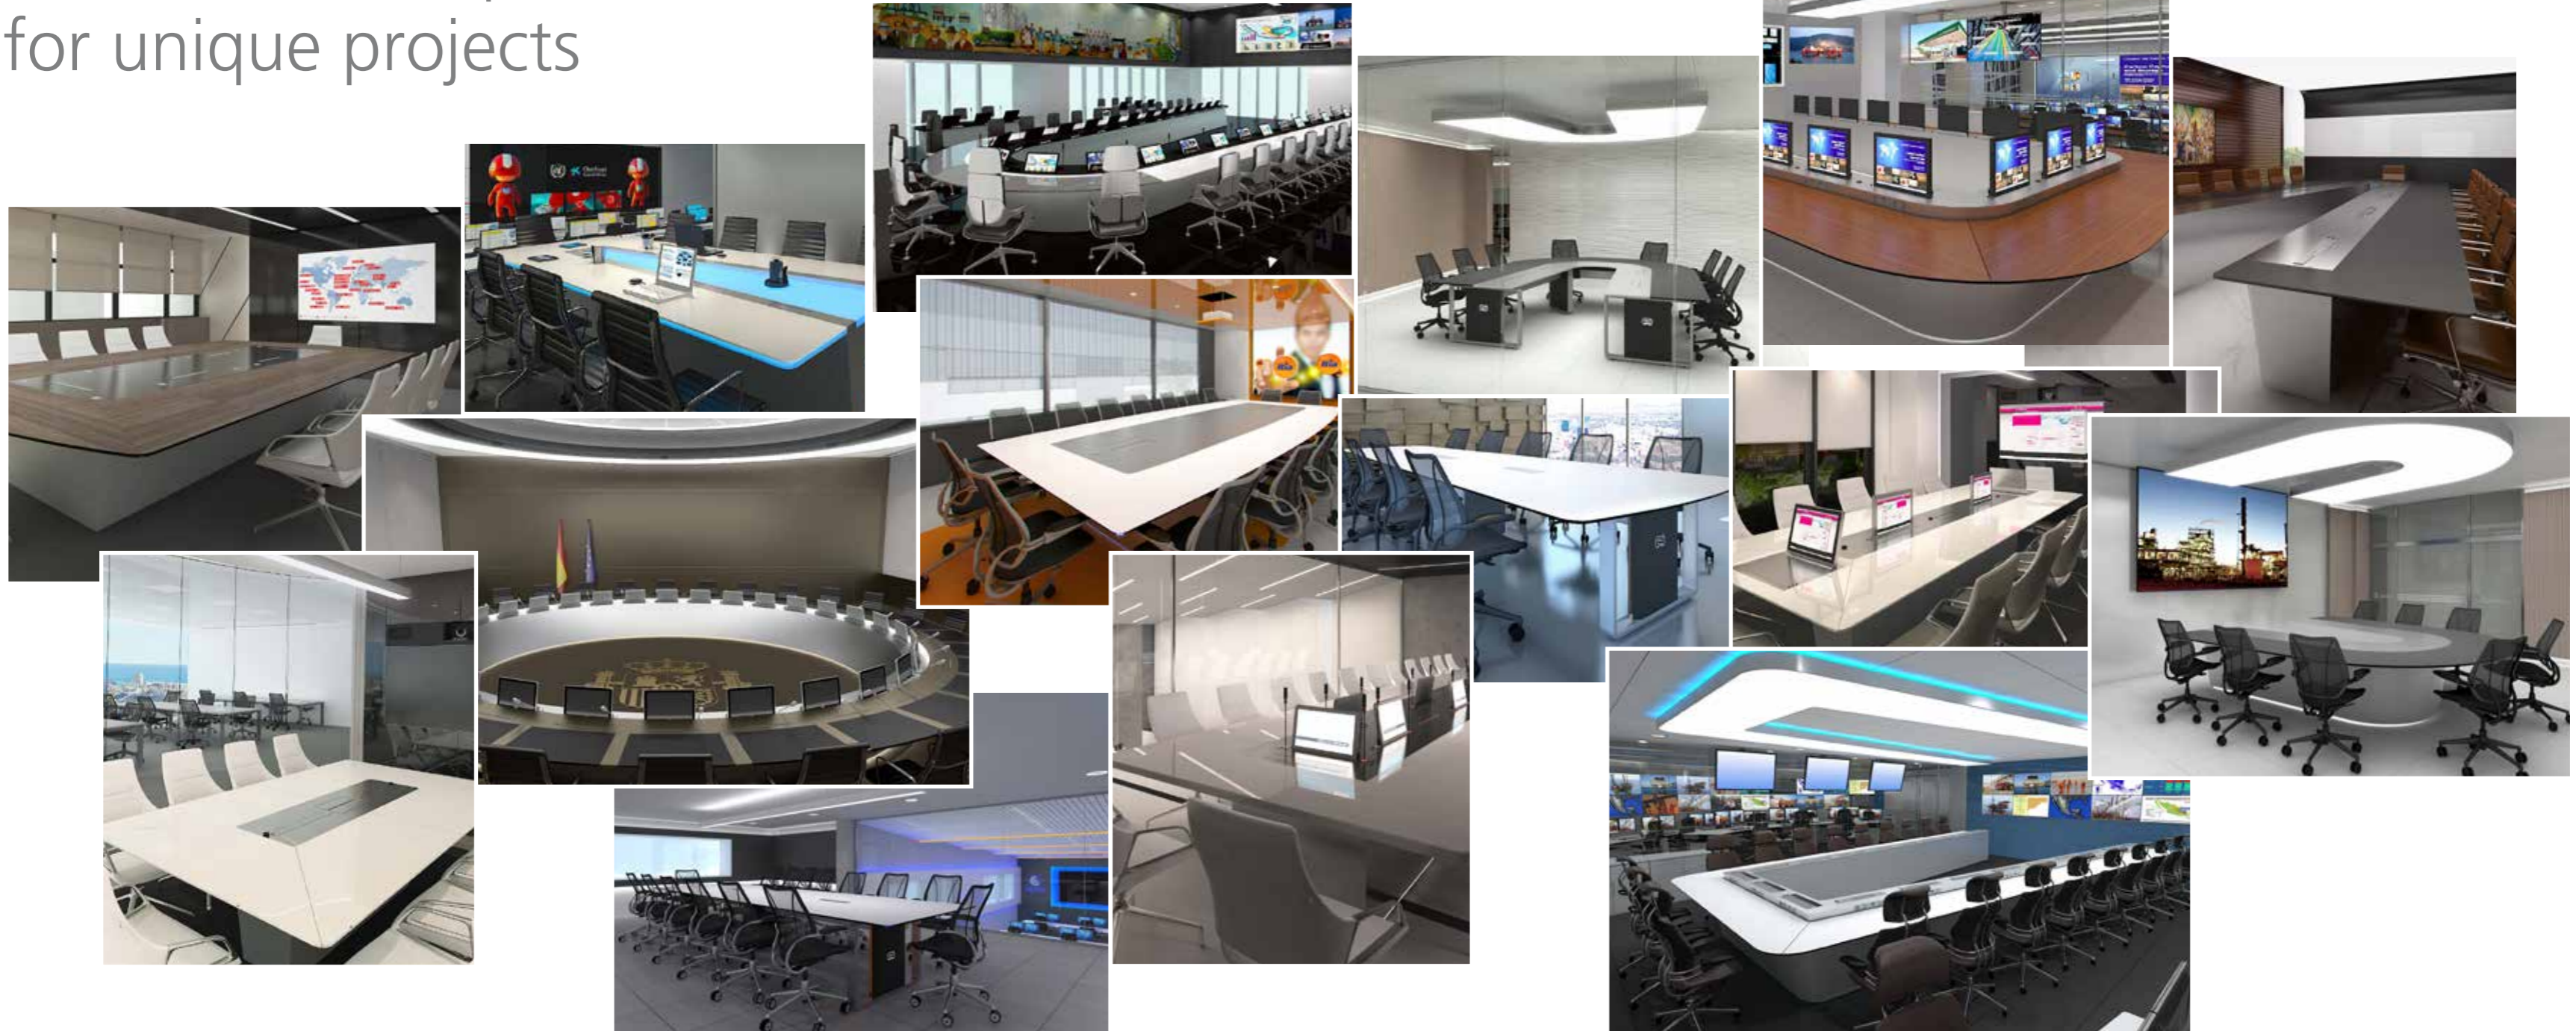

The quality of the finishes and the technology level are designed in a way that is adapted to each project. Collaborative, video conferencing and telecommunications systems are structured from a central core, guaranteeing perfect usability and ergonomics.

One context of use.
One concept of space

One-of-a-kind spaces
for unique projects

A man in a striped shirt is focused on his work at a computer workstation. The scene is set in a modern office with large windows in the background, creating a bright and professional atmosphere. The man is leaning forward, looking intently at the monitor. The text "Materials and finishes that mould passion." is overlaid on the left side of the image.

Materials and finishes that mould passion.

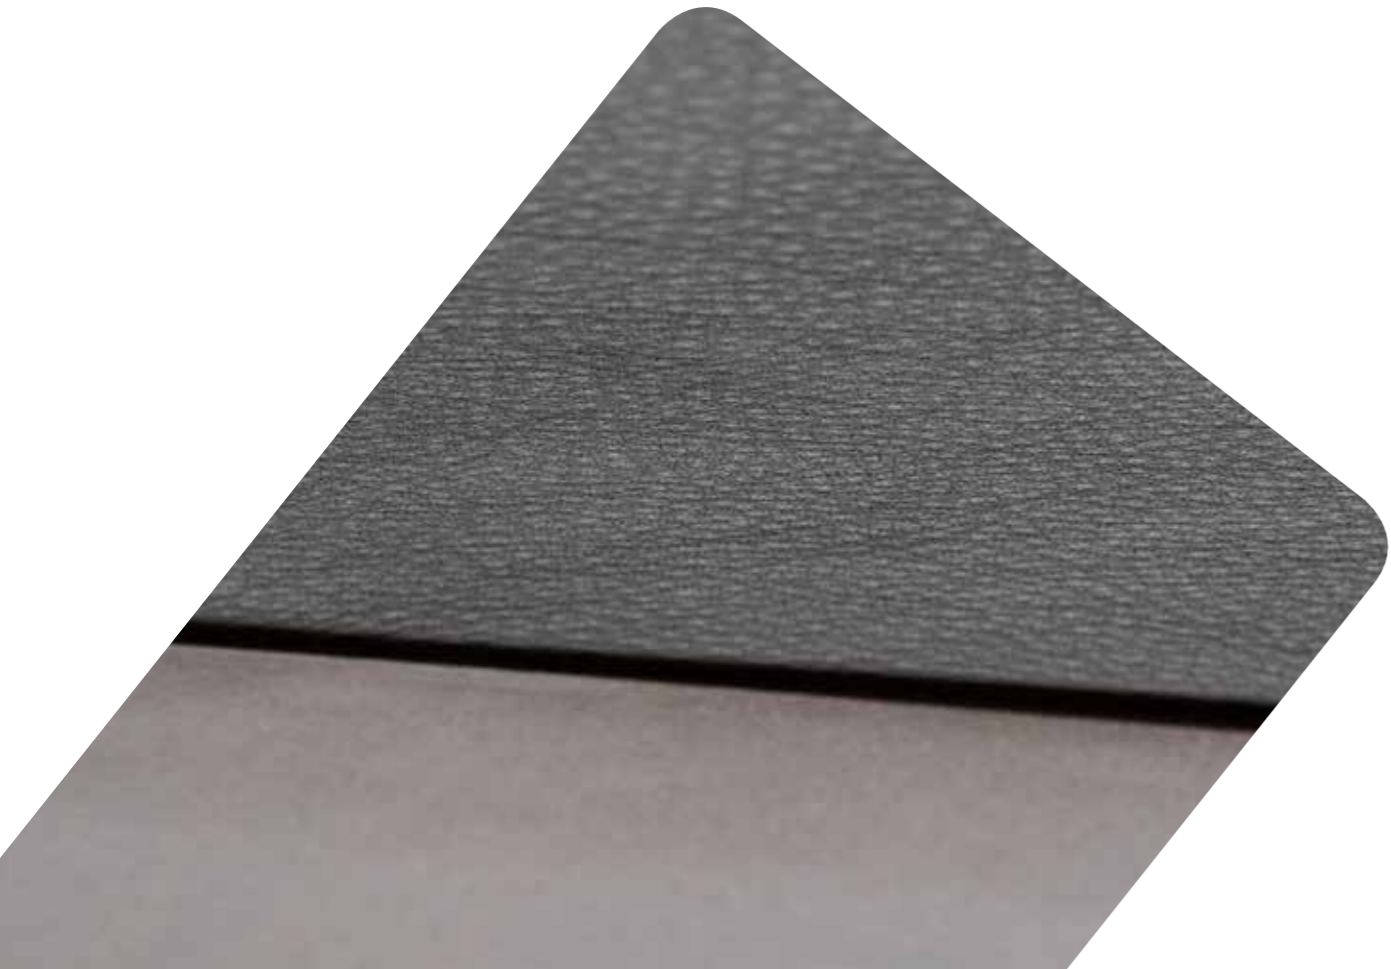

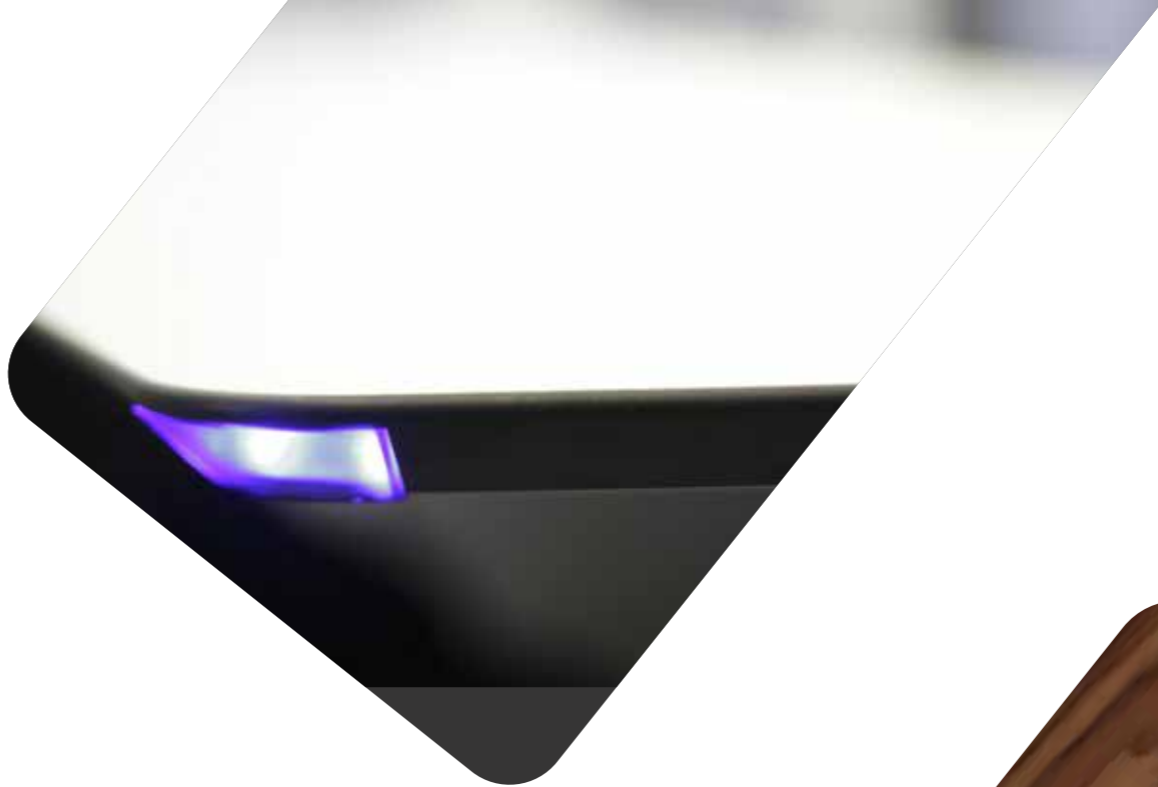

Delicate craftsmanship in every detail

The materials are worked meticulously;
the attention to detail is methodical.

Designed to offer maximum comfort in work environments seeking to maximize productivity and decision making.

Forms, colours and textures that adapt to every need, offering unique experiences.

Striving for total customisation

Each space is unique and communicates the culture and values of an organisation of its own accord. Each environment is unique in its conception, in its design, in its materials and in its execution.

We greatly
increase
technological
possibilities

We create a new human and technological environment to encourage thinking

Personal Dock

Individual connections merge in a completely configurable unique space: power, audio, voice and data connectors converge in a unique module. The Personal Dock is delicately incorporated by means of a retractable system to obtain an elegant unified finish

Resource management

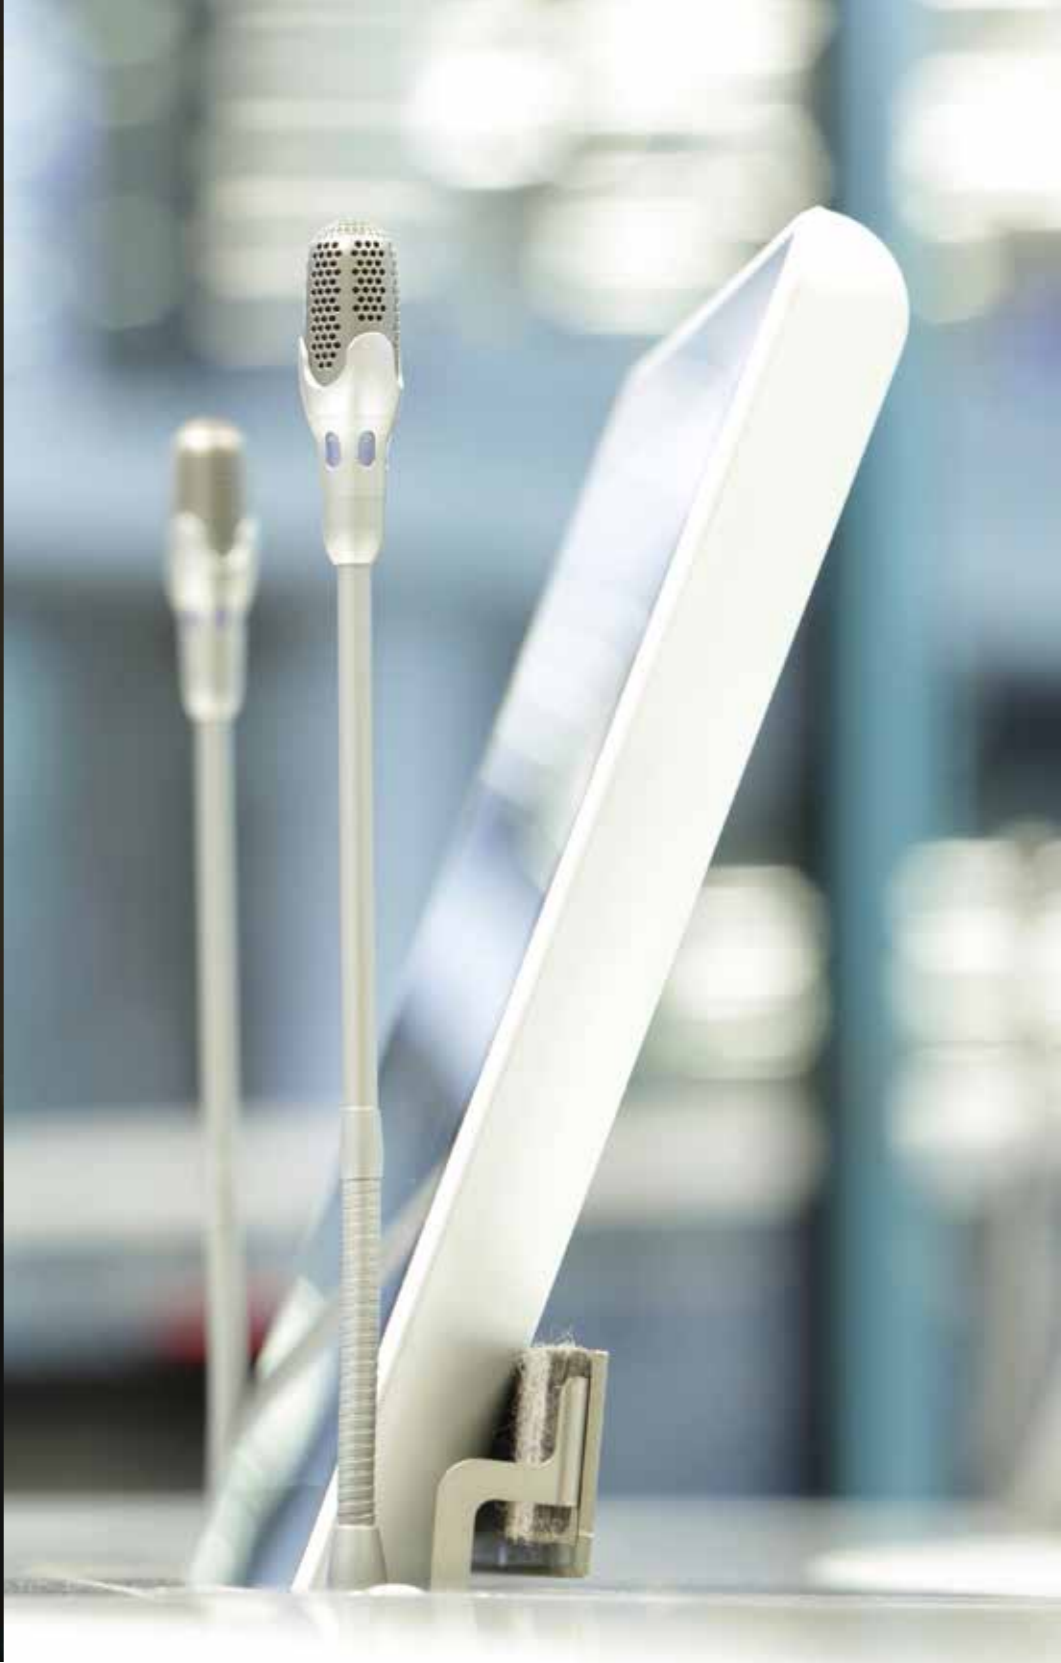

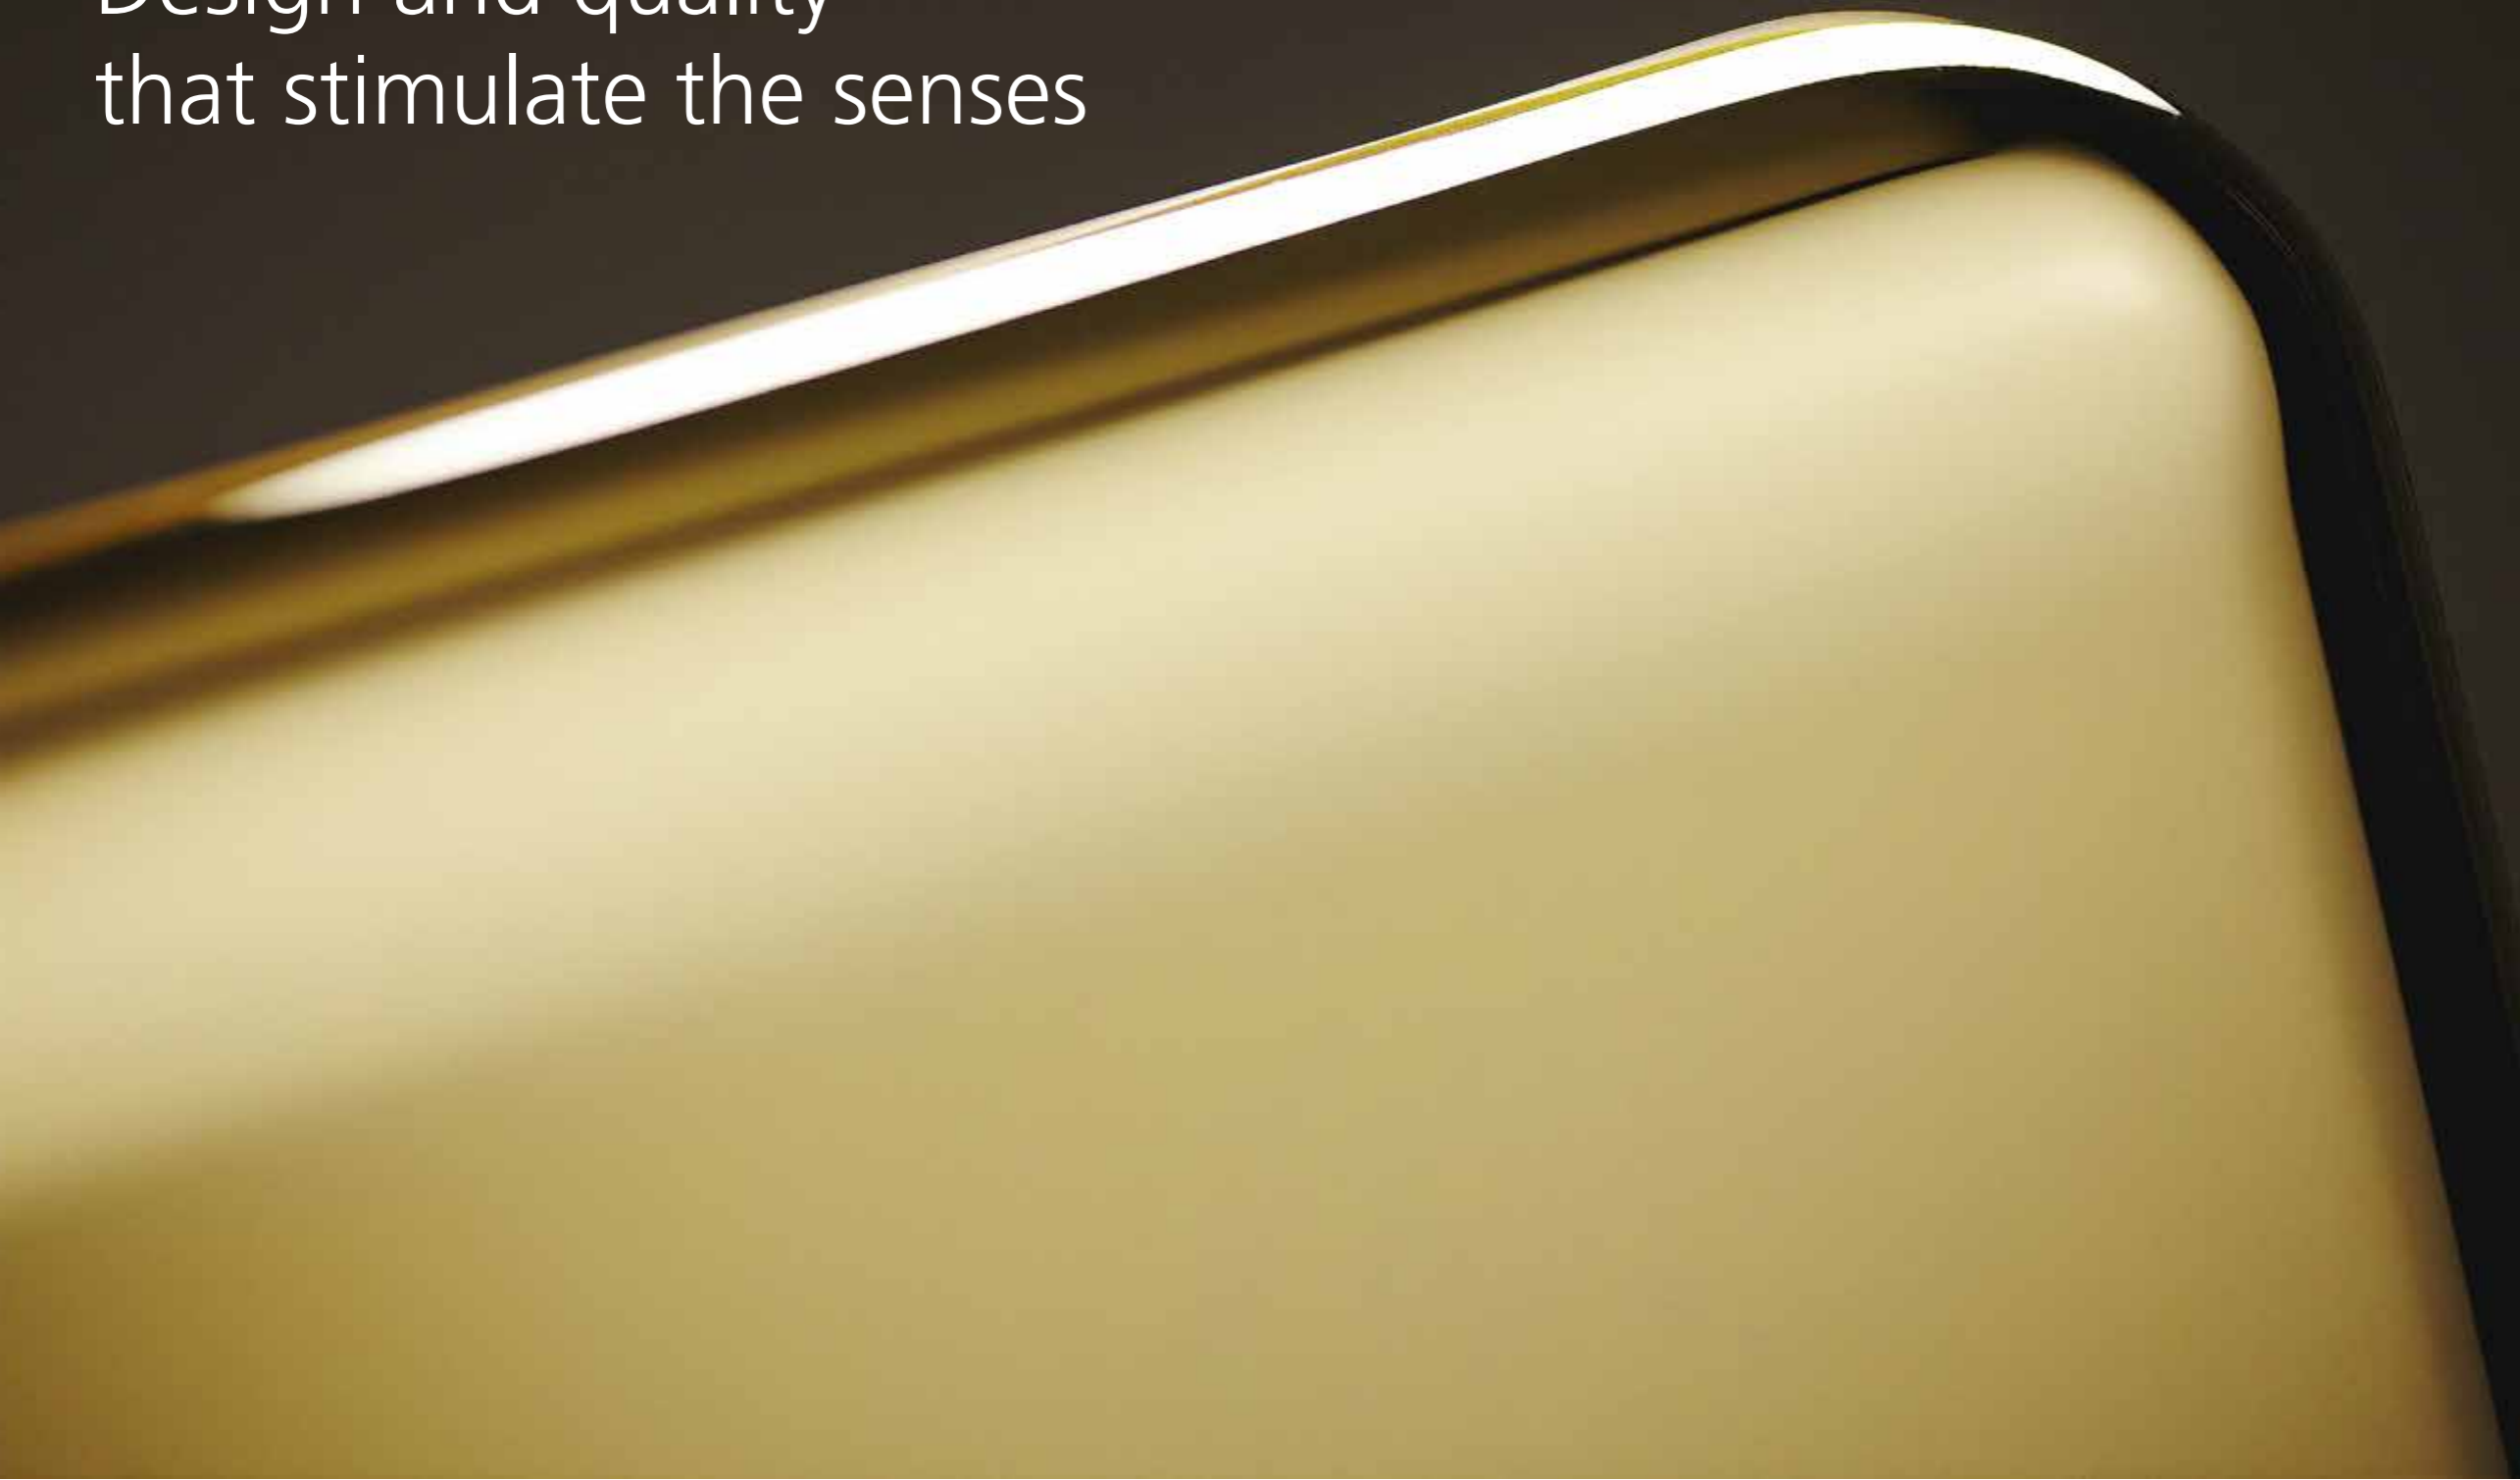

Systems that encourage shared thinking.
Technology at the service of people to optimise resources

Design and quality
that stimulate the senses

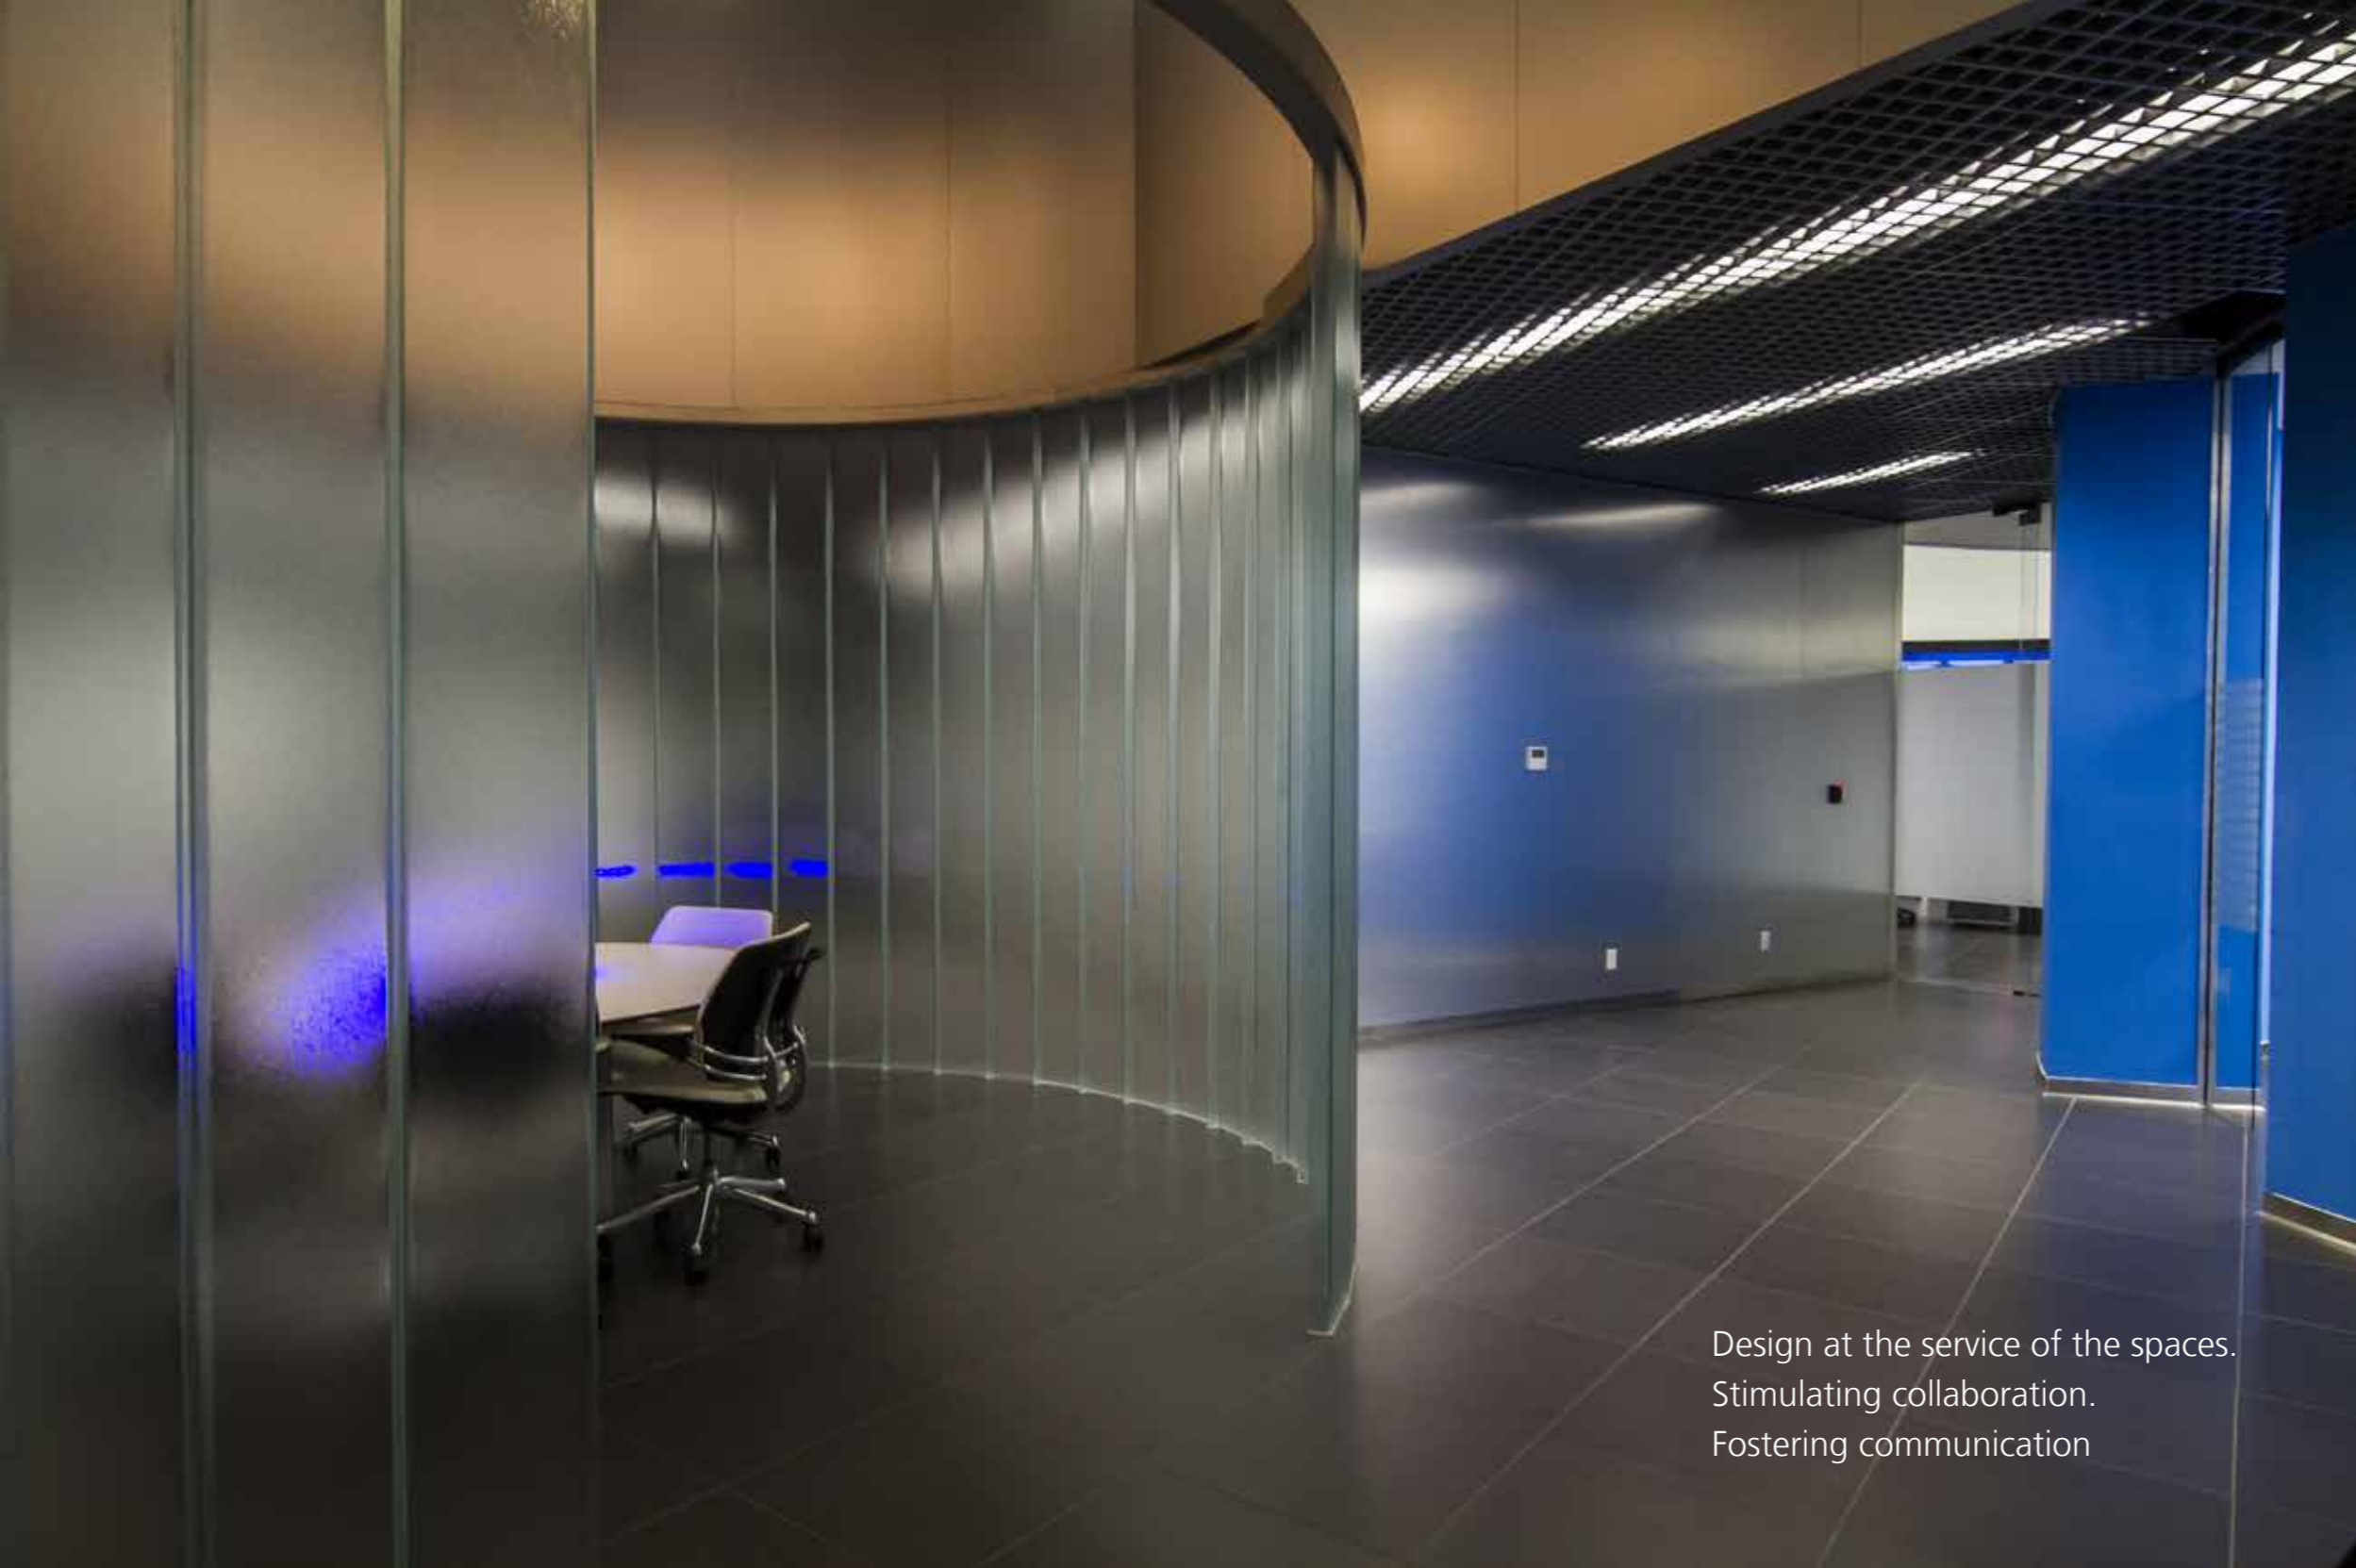

Multifunctional spaces

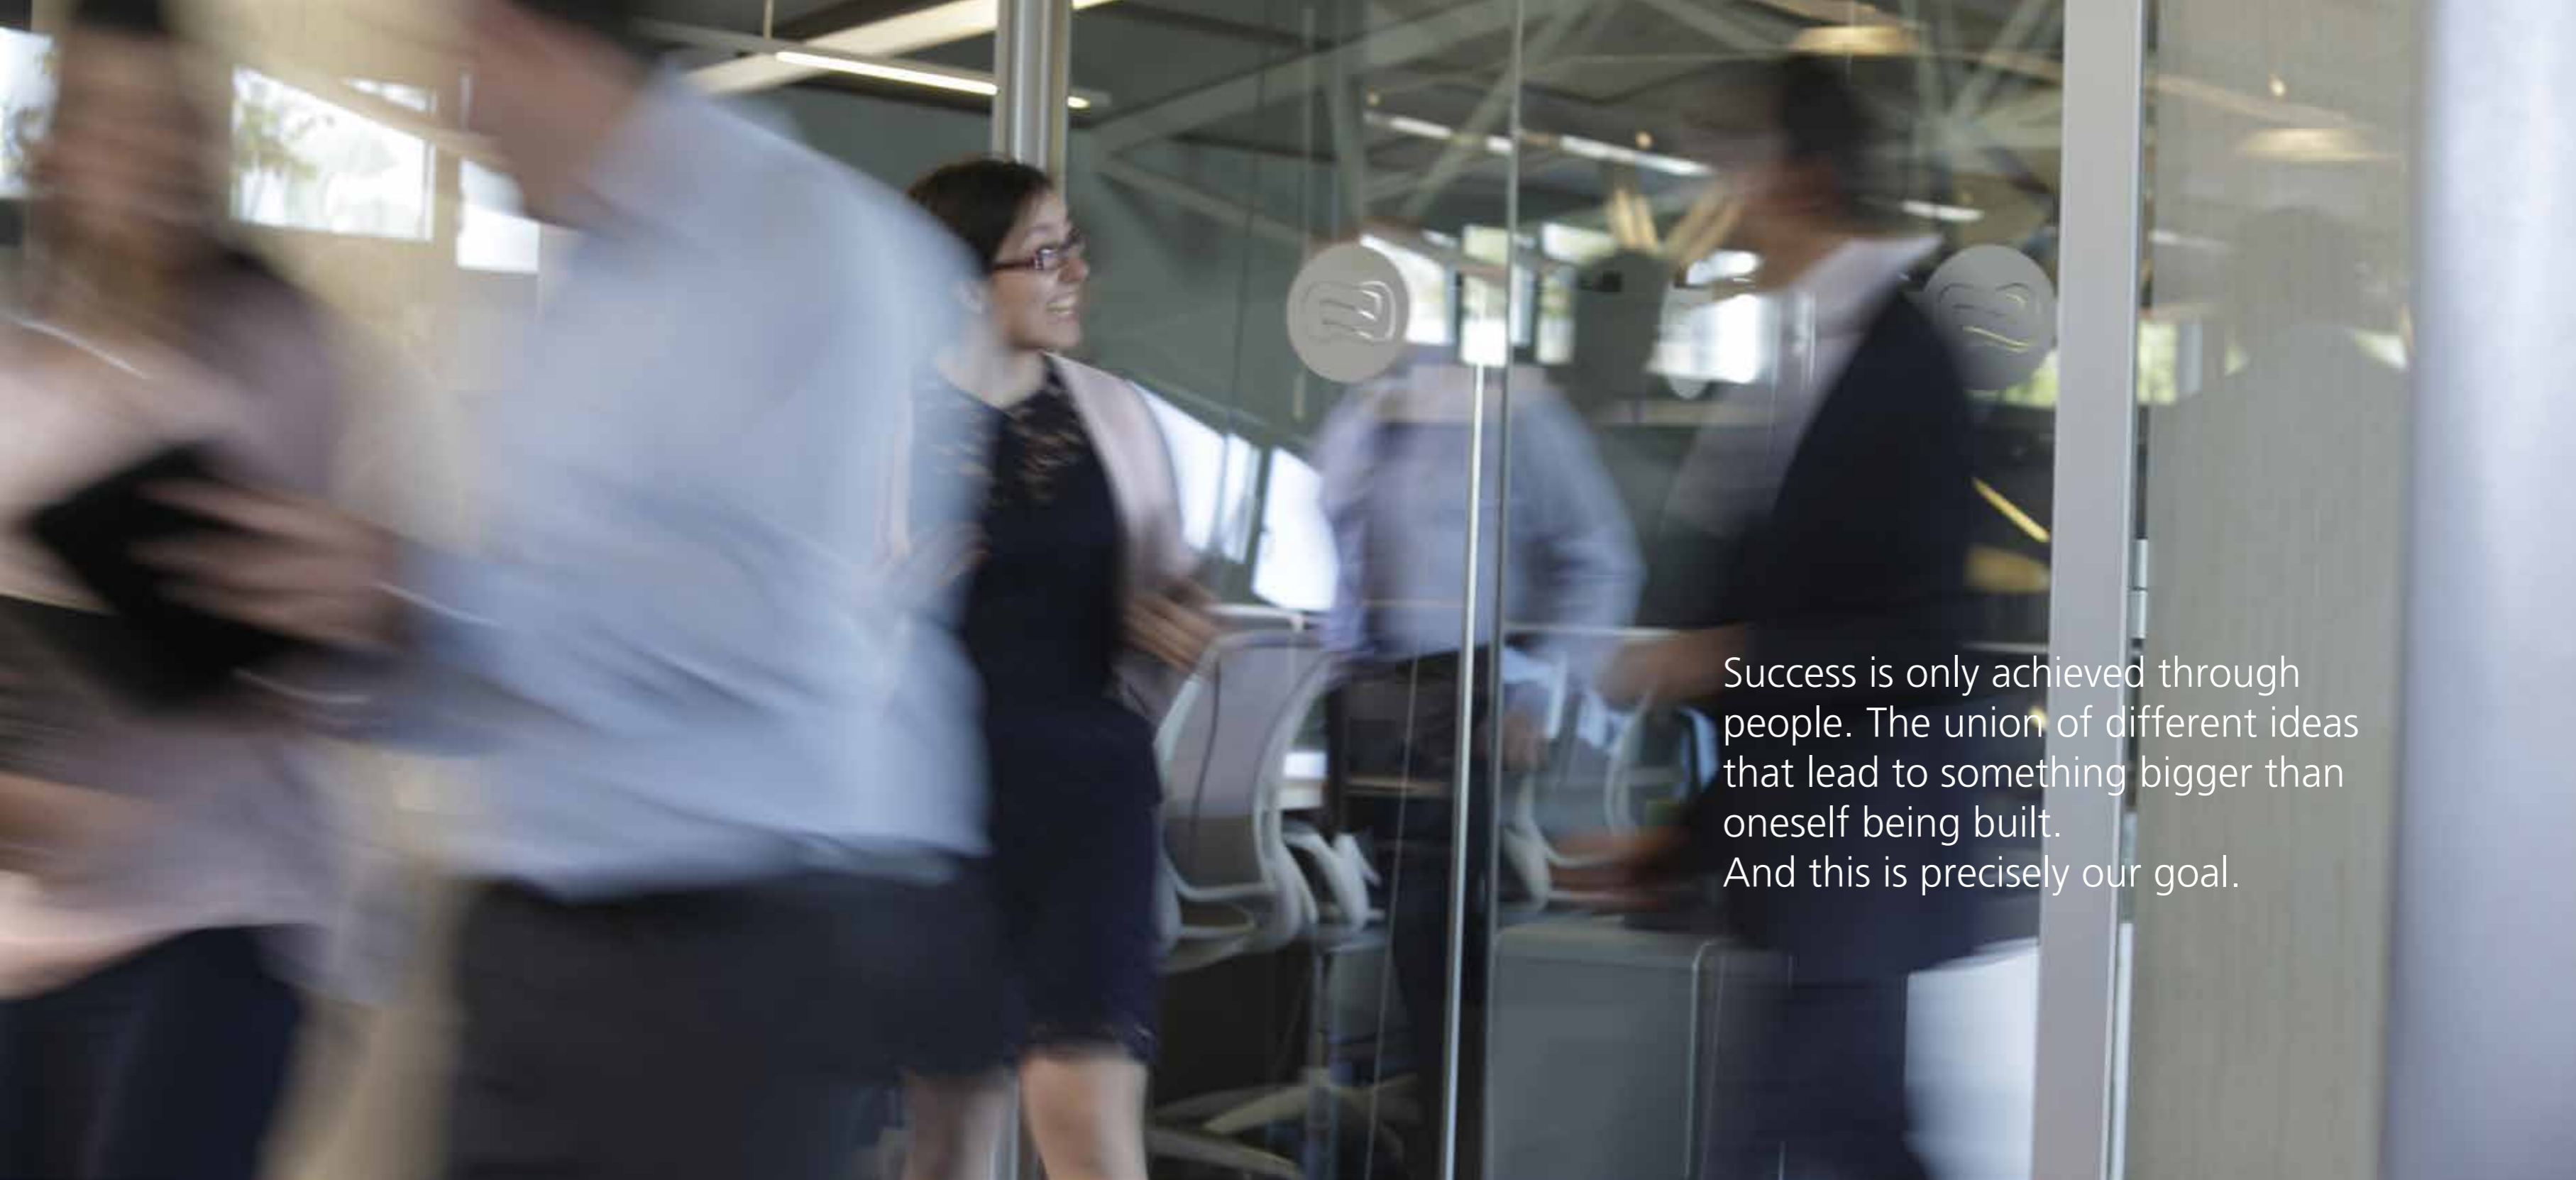

Creating exciting spaces with the inevitable purpose of fostering communication, interaction and collaboration. Converting ideas into environments that transmit a philosophy and values.

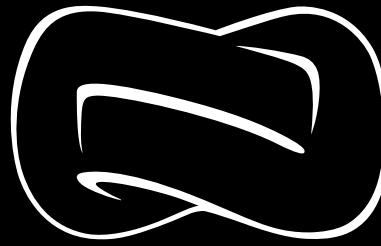

Design at the service of the spaces.
Stimulating collaboration.
Fostering communication

Success is only achieved through people. The union of different ideas that lead to something bigger than oneself being built. And this is precisely our goal.

Meeting GESAB

Barcelona

938 427 050
Avda del Mogent 68
08450 Llinars del Valles

Madrid
